### About Breaker

Breaker Resources NL is a significant tenement holder in WA's Eastern Goldfields Superterrane in the Yilgarn Craton. Breaker's objective is the discovery and development of large new, greenfields gold deposits. Its long-term exploration strategy focuses on the use of innovative multi-element geochemical techniques to identify new gold systems concealed by transported cover in unexplored parts of a world class gold province, WA's Eastern Goldfields Superterrane in the Yilgarn Craton. The Company's research and development project activities augment this strategy.
